A. Steps for generating PAR data for study area

STEP I: Data acquisition from MOSDAC portal

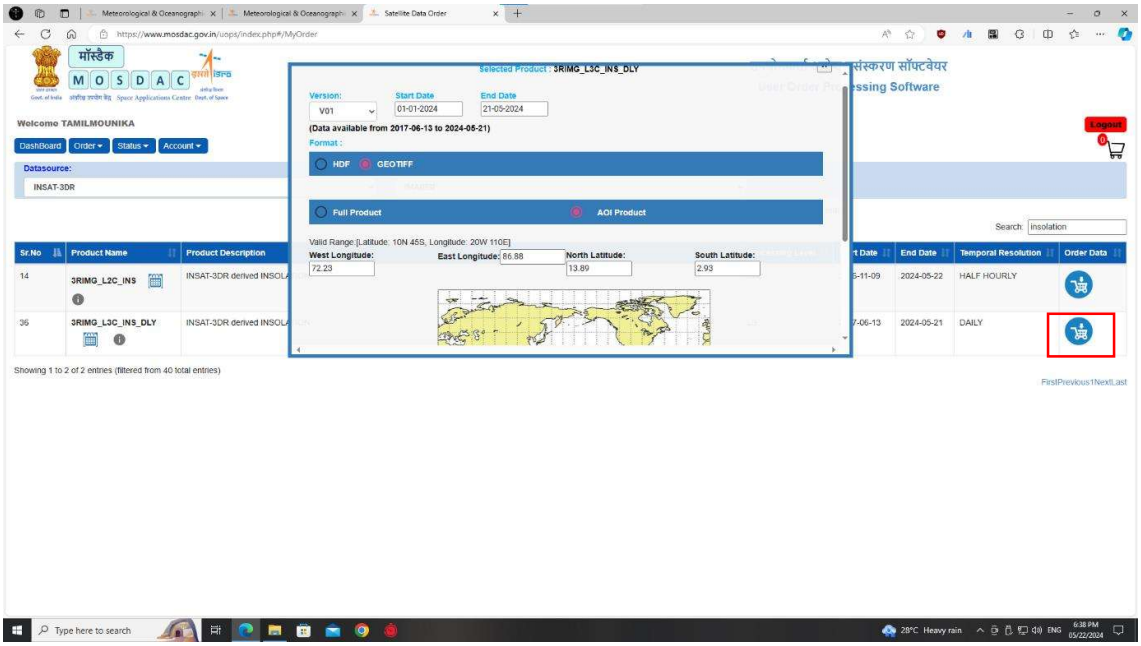

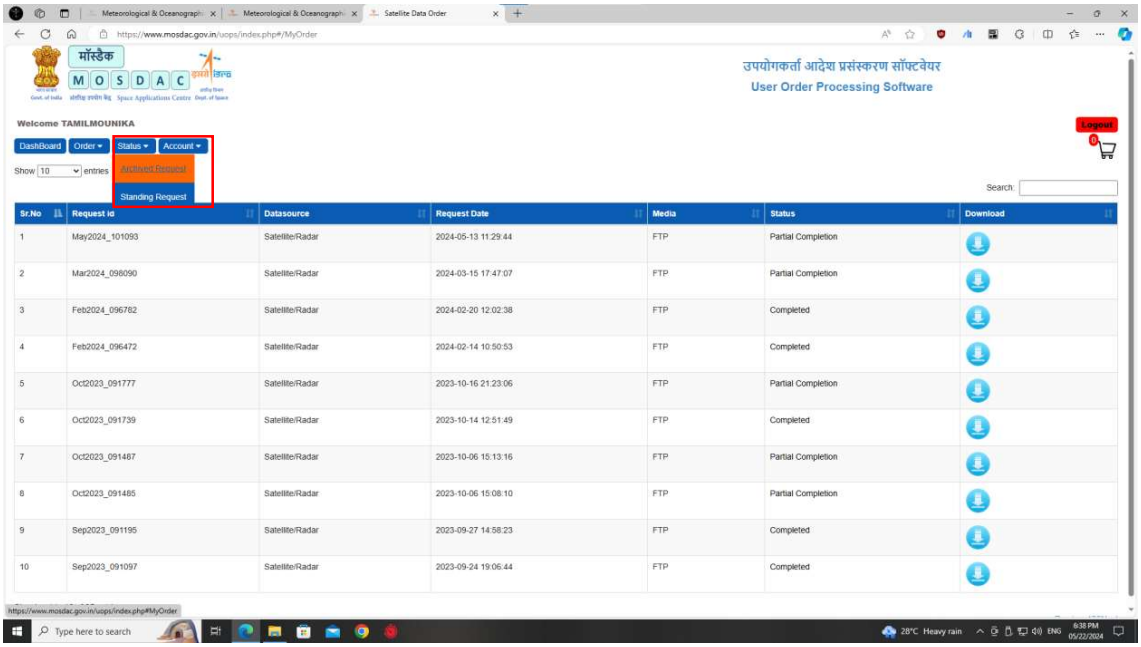

STEP II: INSOLATION data selection from MOSDAC portal

STEP III: AOI extraction from MOSDAC portal

STEP IV: Accessing order progress status from MOSDAC portal

STEP V: Accessing completed order through link from e-mail using FTP server

Your Data Request having following details has been processed successfully.

Request id: Sep2023_91097
Order Date: 24-Sep-2023
Order Completed Date: 24-Sep-2023
Total Products: 79

You can use following methods to download or carryout Interactive computing on your ordered products using your MOSDAC credentials

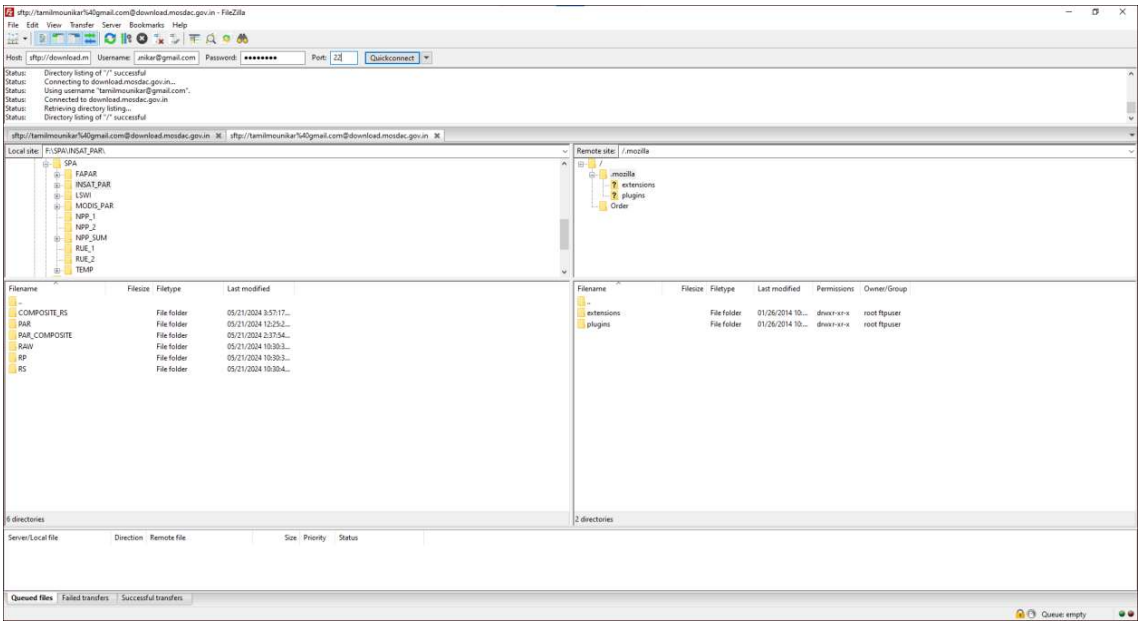

1) Https based Interactive download : https://mosdac.gov.in/sso-download

2) Interactive Computing using Python Notebooks : https://mosdac.gov.in/mosaiclab

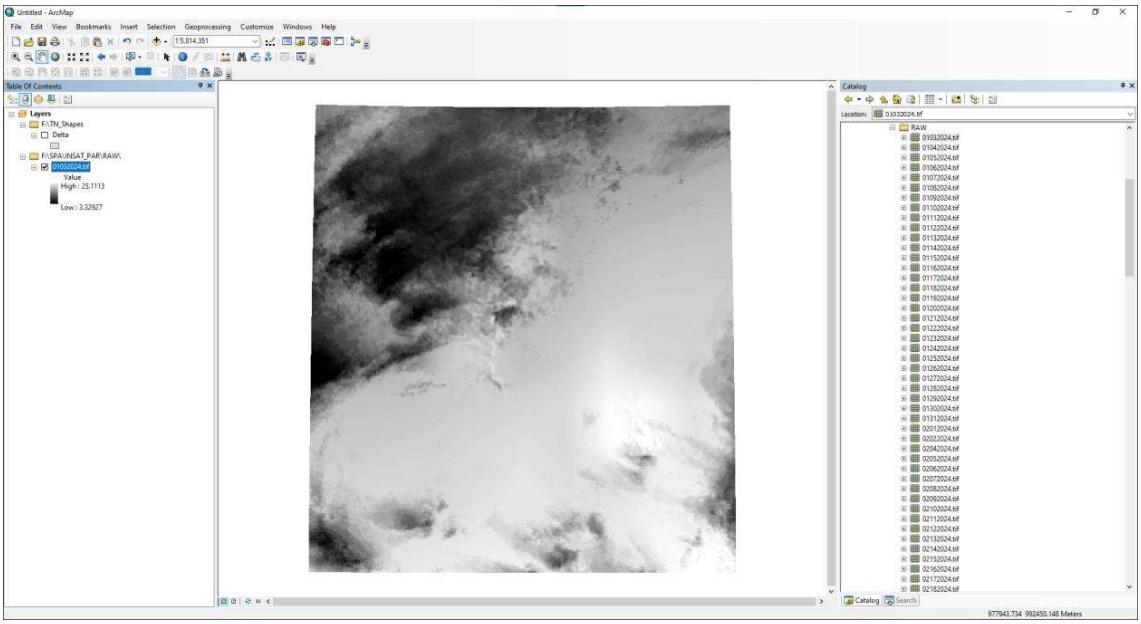

3) Bulk download using sftp protocol using (Winscp/filezila/lftp) : sftp://download.mosdac.gov.in)
Server: download.mosdac.gov.in
Port: 22

Please refer to following documents for help
Bulk download using SFTP : https://mosdac.gov.in/sites/default/files/docs/sftp-mosdac.pdf
Interactive Computing using MOSAIC: https://mosdac.gov.in/sites/default/files/docs/MOSAIC_about.pdf

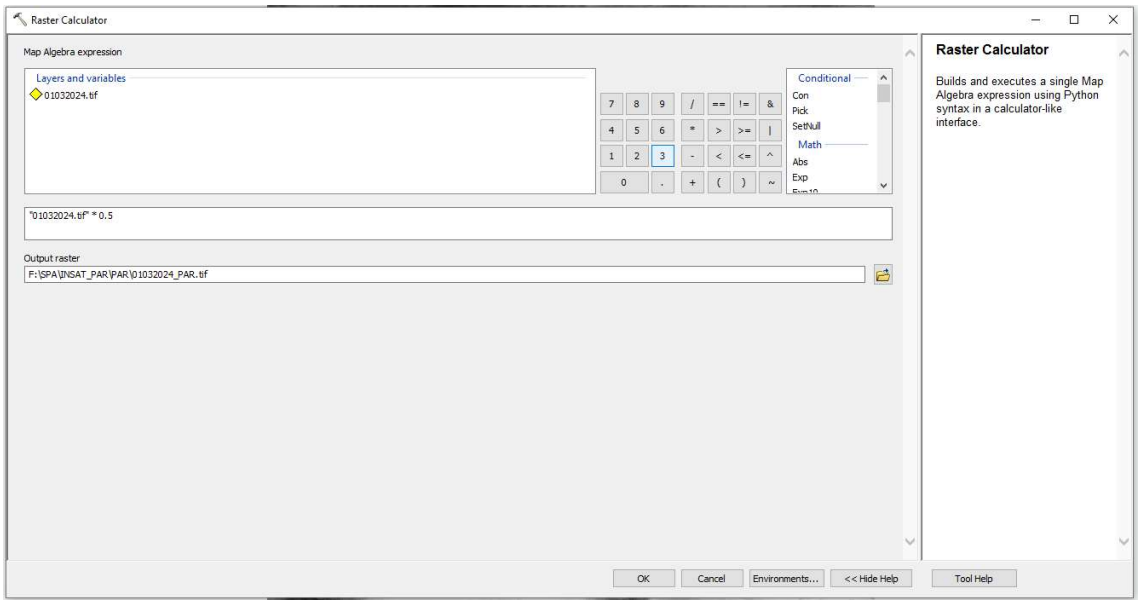

Please Note : Ordered products will be available only for 5 days for download.

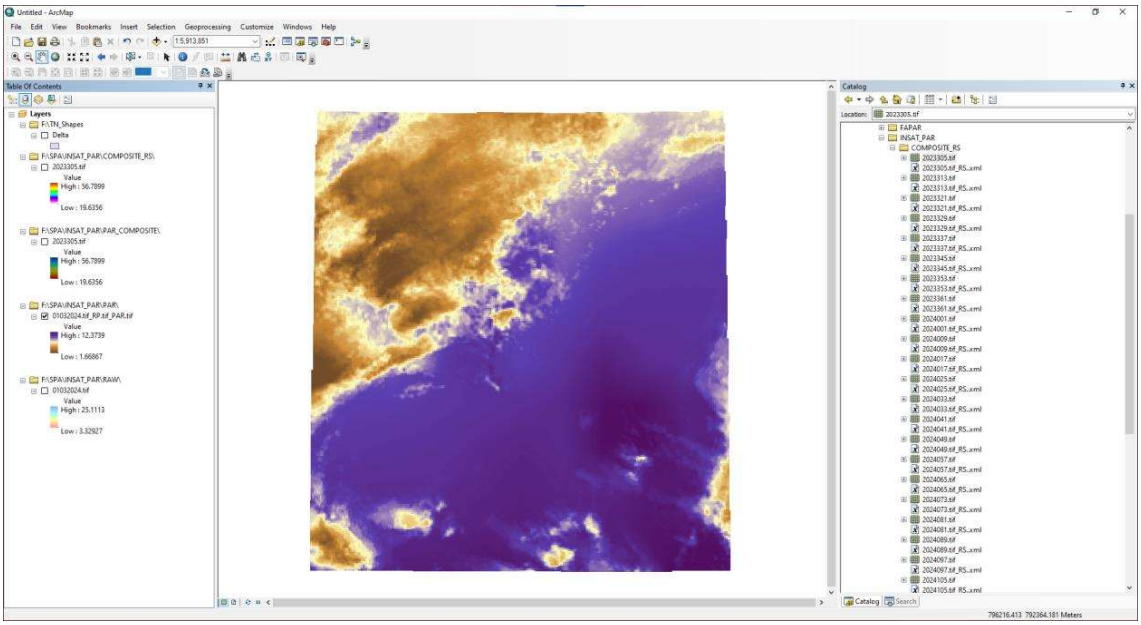

Downloaded Raw data from INSAT 3DR

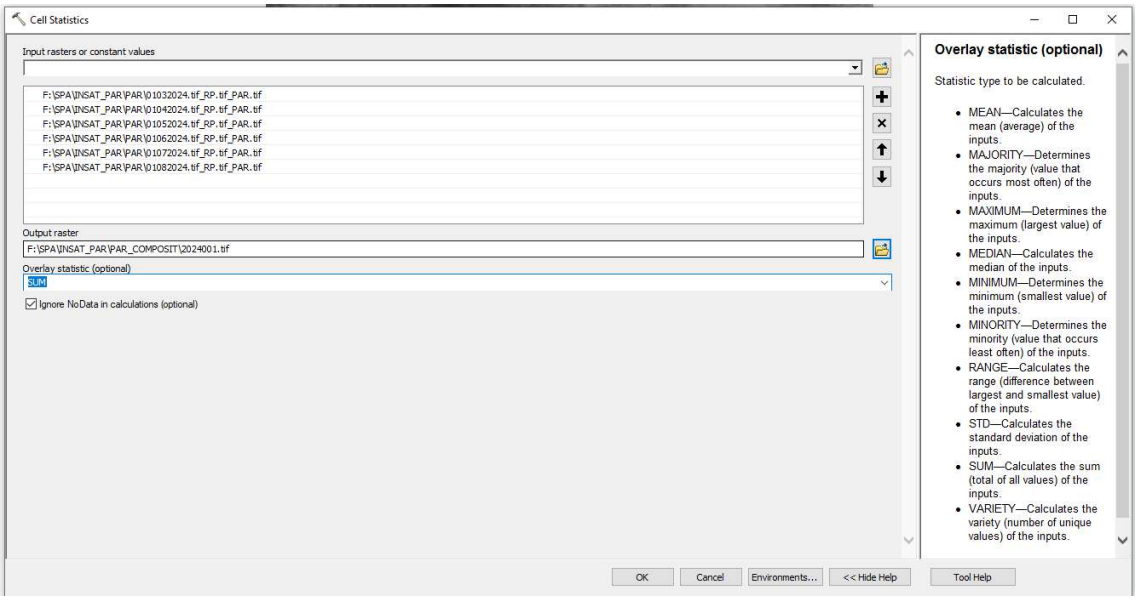

STEP VI: Conversion of INSOLATION to Photosynthetic Active radiation by multiplying with 0.5 using *Raster Calculator* tool

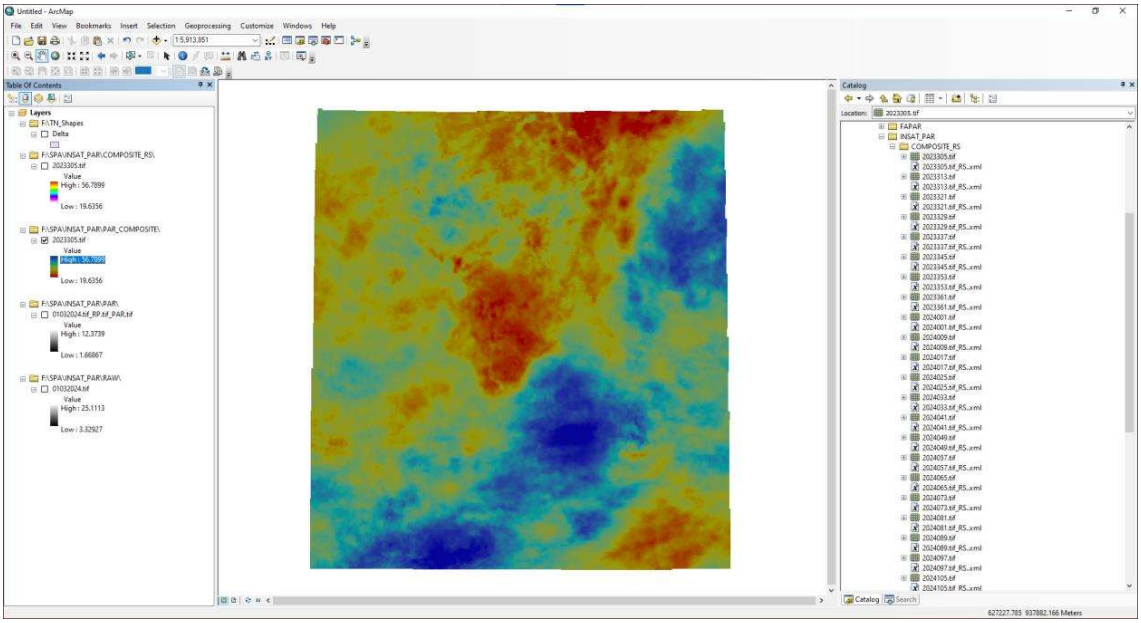

Raster output of PAR retrieved from Insolation data

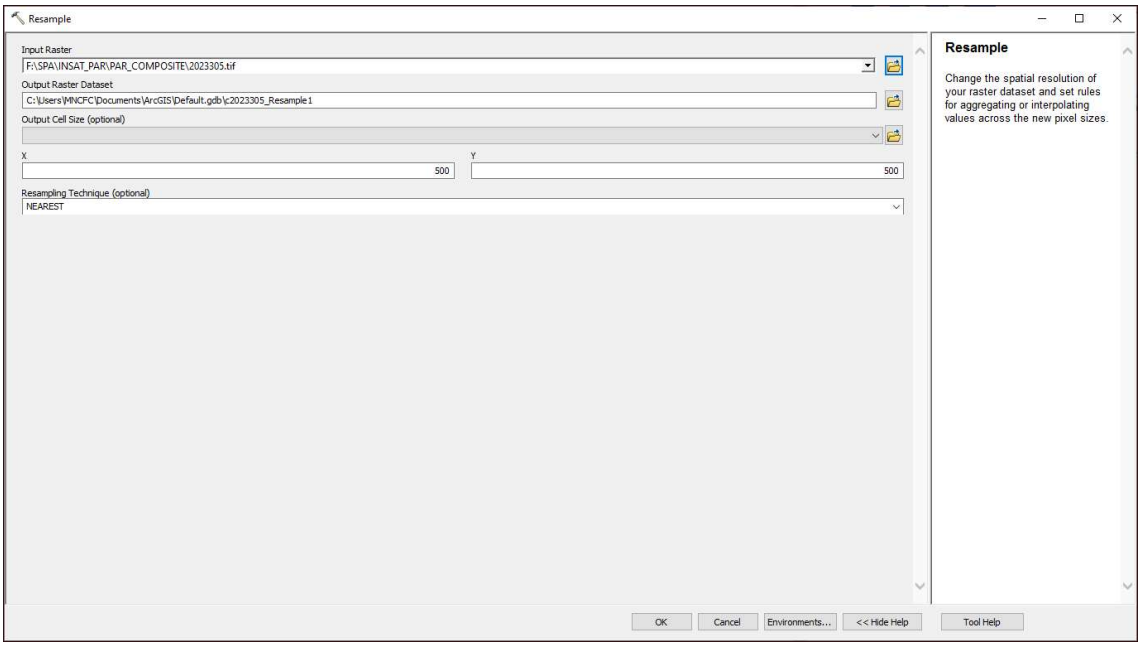

STEP VII: Generation of 8 Day Composite of PAR data pertaining to the Temporal resolution of MODIS data using *Cell Statistics* tool

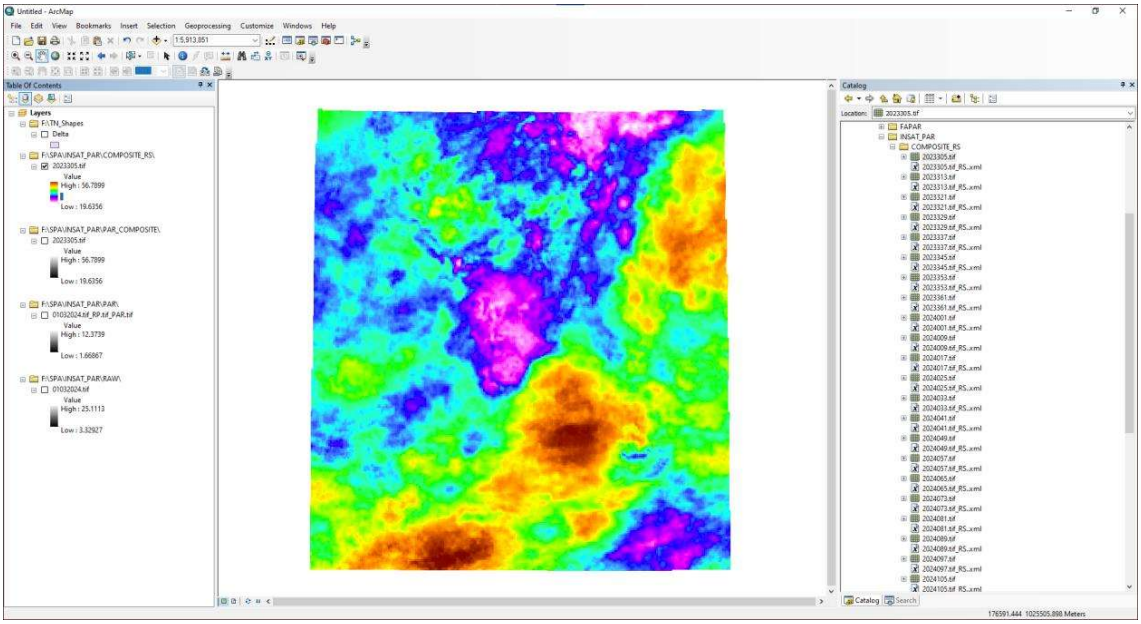

Raster output of 8 Day Composite of PAR data

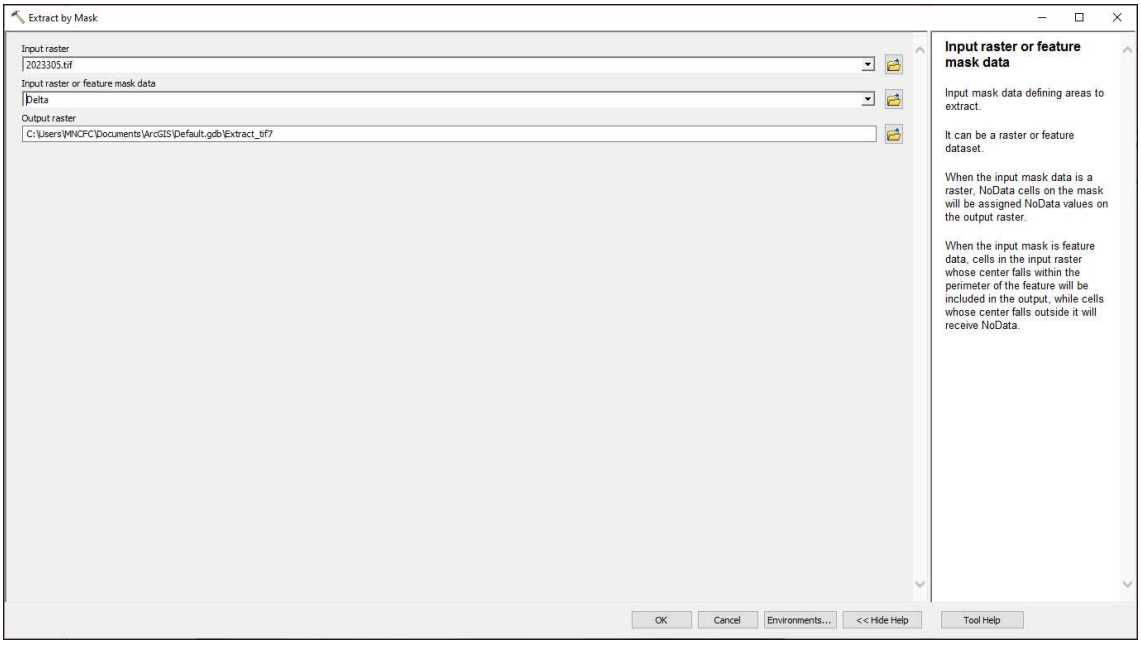

STEP VIII: Resampling of 8 Day Composite of PAR data into 500 metre using *resample* tool

Raster output of Resampled 8 Day Composite

STEP IX: Raster Extraction for study area using *Extract by Mask* tool

Raster output of Resampled 8 Day Composite
